

Frosty Pink Angel's Trumpet*
Brugmansia 'Frosty Pink'

Height: 8 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: (annual)

Description:

A heat loving variety that likes warm days and cool nights; large dangling pink trumpets emerge in summer and appear until fall; flowers are only fragrant at night; perfect for containers, beds, and borders for a stunning presentation all season

Ornamental Features

Frosty Pink Angel's Trumpet features showy fragrant shell pink trumpet-shaped flowers with creamy white throats hanging below the branches from early summer to mid fall. Its attractive large serrated pointy leaves remain green in color throughout the year.

Landscape Attributes

Frosty Pink Angel's Trumpet is a multi-stemmed annual with an upright spreading habit of growth. Its wonderfully bold, coarse texture can be very effective in a balanced garden composition.

This is a relatively low maintenance plant, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Frosty Pink Angel's Trumpet is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Frosty Pink Angel's Trumpet will grow to be about 8 feet tall at maturity, with a spread of 5 feet. It has a low canopy with a typical clearance of 2 feet from the ground. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Frosty Pink Angel's Trumpet is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
