

**The Third Harmonic Alstroemeria**  
*Alstroemeria 'The Third Harmonic'*

Plant Height: 3 feet

Flower Height: 4 feet

Spread: 30 inches

Spacing: 24 inches

Sunlight:

Hardiness Zone: (annual)

Other Names: Peruvian Lily

**Description:**

This vigorous variety presents stunning blooms that open yellow, then age to dark orange with black markings; thick clumps of crisp green foliage adds interest; blooms year-round in frost free areas

**Ornamental Features**

The Third Harmonic Alstroemeria features showy bracted yellow trumpet-shaped flowers with orange overtones, burgundy throats and black spots at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its attractive pointy leaves remain bluish-green in color throughout the season.

**Landscape Attributes**

The Third Harmonic Alstroemeria is an herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It is a good choice for attracting bees, butterflies and hummingbirds to your yard. It has no significant negative characteristics.

The Third Harmonic Alstroemeria is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

## Planting & Growing

The Third Harmonic Alstroemeria will grow to be about 3 feet tall at maturity extending to 4 feet tall with the flowers, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

The Third Harmonic Alstroemeria is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
